Hush with Novocore Technology

Hush with Novocore Technology offers innovation in flooring with superior comfort, stability and hygiene. Years of research and product development have culminated in this truly amazing floor, which is not only 100% waterproof, but also offers a non-toxic antibacterial surface, making it ideal for kitchens as well as conventional living areas. Furthermore, it adds a cork base layer for better sound absorption, more comfort and allows for application over less-than perfect sub-floors and ceramic tiles.

Hush with Novocore Technology uses cutting edge technology to provide you with a floor that eliminates harmful bacteria through its SE+ anti-bacterial action surface. SE+ is a revolutionary floor surface which disrupts the metabolism of bacteria, thus inhibiting bacteria survival, reproduction and colonisation.
