Novocore Premium XL

Novocore is a Stone Plastic Composite (SPC), utilising over 60% natural limestone to provide superior stability, rigidity and performance.

Novocore Premium adds a cork base layer for better sound absorption, comfort and allows for application over less-than-perfect sub-floors and ceramic tiles. Furthermore, Novocore Premium's cork backing is hypo-allergenic. It inhibits the growth of mould and mildew, which makes it ideal for wet areas where hygiene is critical. Cork also adds extra comfort to the floor, making it easier on feet and limbs, removing the feel of the harsh sub-floor. Add to this an extra rigid layer of high density vinyl, and you have a fantastic flooring solution.

Novocore Premium was built to be 100% recyclable and is completely free of Phthalates and other harmful plasticisers, keeping the indoor environment cleaner than it's ever been.

Being an extremely stable floor, Novocore Premium can be installed in areas up to a massive 400m², without the need for expansion trims! This is 4x the area recommended for a standard resilient floating floor! It also makes it a great solution for commercial application.

Features & Benefits

Specification

Dimension: 1806 x 223mm

Thickness: 6.5mm

Pack size: 1.61m²

Wear layer: 0.55mm

Joining system: Tight lock

Planks/pack: 4

Warranty: Lifetime Residential
