San Matteo  
Glacier

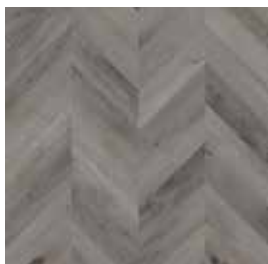

# Fashion House Chevron

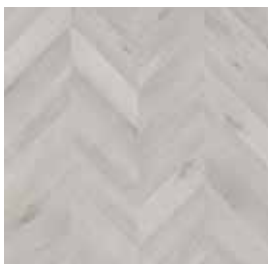

Fashion House is a conceptual, boutique-style collection of large-scale patterned floors built on the foundation of ISOCORE Technology®. The Fashion House visuals offer high-style, designer looks in wood grain patterns, which allow the end user to go beyond traditional designs into quasi-custom looks, without the additional time and expense of specifying a custom product. Fashion House floors feature a 2.0mm LVT layer and a 0.55mm commercial wear layer coated with FX3 Surface Protectant for unrivalled abrasion resistance and stain repellency. A pre-attached IXPE underlayment provides sound mitigation and enhanced comfort underfoot. Fashion House luxury vinyl flooring is both pet and kid friendly. Fashion House offers authentic colour and texture for a realistic look and feel, and features a drop-and-lock installation system making it fast and easy for both Pros and DIYers to install. Fashion House is available in two unique, on-trend designs, Chevron and Basket Weave, which will transform your living space.
